*DIAGNOSTICS

The Magicam arcade system contains a complete diagnostic package controlled by an internal switch. This self testing feature checks for general malfunctions, indicating any problem areas with a written message on the video screen.

The diagnostic system thoroughly analyzes each of these vital subsystems in your machine and will give you indication of any malfunction and where it is occuring:

*ROM and RAM
*Sound
*Display
*Keyboard, including the coin switch
*Laser disc
Video Monitor

*CONVERTIBILITY

This project is available in either a money-saving conversion kit or a complete new Laser Disc unit

The conversion kit package allows you to utilize existing hardware and our latest game products in your location at a substantial savings.
